

# UCSD Pascal Goes DOS

Now you can penetrate the expanding world of MS\*-DOS and PC-DOS while writing applications in the language programmers love:

UCSD Pascal\*. The original. The fully-developed industry standard. Complete with extensions for system development and commercial applications programming.

Now you can write programs in UCSD Pascal and execute them under the control of PC-DOS and MS-DOS. Without fuss or complications.

It's made possible by SofTech Microsystems, creators of the microcomputer development environment praised by novice and professional programmers alike. Now you can capitalize on today's emerging standards with tomorrow's technology. Our completely integrated environment offers you sophistication, coupled with ease of use. And it's modular, expanding to fit your needs.

Start with the basics: UCSD Pascal, a complete set of development utilities; a full-screen, full-function editor and a file manager.

Add another language. Or two. Such as FORTRAN-77 or BASIC. Our compilers generate compact code and are truly integrated with the development environment.

Edit with ease. When an error is detected, the editor may be invoked and positioned at the statement in error.

You can also write in smaller program segments. This simplifies debugging and testing and lets you use common procedures in multiple applications. Even if they were

written in one of our other languages.

For professional developers, we also offer a full set of productivity tools such as assemblers and a symbolic debugger.

**And there's more.**

Our Insight Window Designer\*, for instance, allows you to write windowed applications that include help screens, pick lists, data entry and more in a rainbow of colors.

Clip and mail the coupon below. Or call us at 619/451-1230. We'll send you information on the extensive line of SofTech Microsystems' products.

You'll find that UCSD Pascal goes MS-DOS. And a lot of other places besides.

**FOR 15 YEARS,  
WE'VE BEEN  
MAKING  
THE WORLD'S  
MOST POPULAR  
MODEMS.**

**NOW YOU CAN  
BUY ONE.**

Introducing the Maxwell Modem™ from Racial-Vadic.

It's not your fault you didn't buy one sooner. You couldn't. Unless you happened to be a major corporation. They're the ones who buy the most modems. And the modems they buy most are ours.

Now we've taken everything we know about modems and made one you can buy.

The Maxwell Modem.

It's designed expressly for personal computers. And the people who use them. It's rugged. Reliable. And it even operates over low-quality phone lines that other modems can't handle.

But best of all, it's uncomplicated. So you don't have to know how one works to work one. There's no control panel to control. No switches to switch.

Instead, every feature makes sense. Auto-dialing. Auto-answer. And complete unattended operation.

Our communications software is just as accommodating. It's called George." And we've made George so simple to use you may never have to open your manual.

The Maxwell Modem comes in two different versions and two different speeds: Internal modems for the IBM PC and compatibles, and desktop models for virtually every personal computer. Both are available with speeds of 300- or 1200-bps.

And every Maxwell Modem has diagnostic features built in. So we can test your modem right over the phone from our Remote Diagnostic Center. We'll even pay for the call.

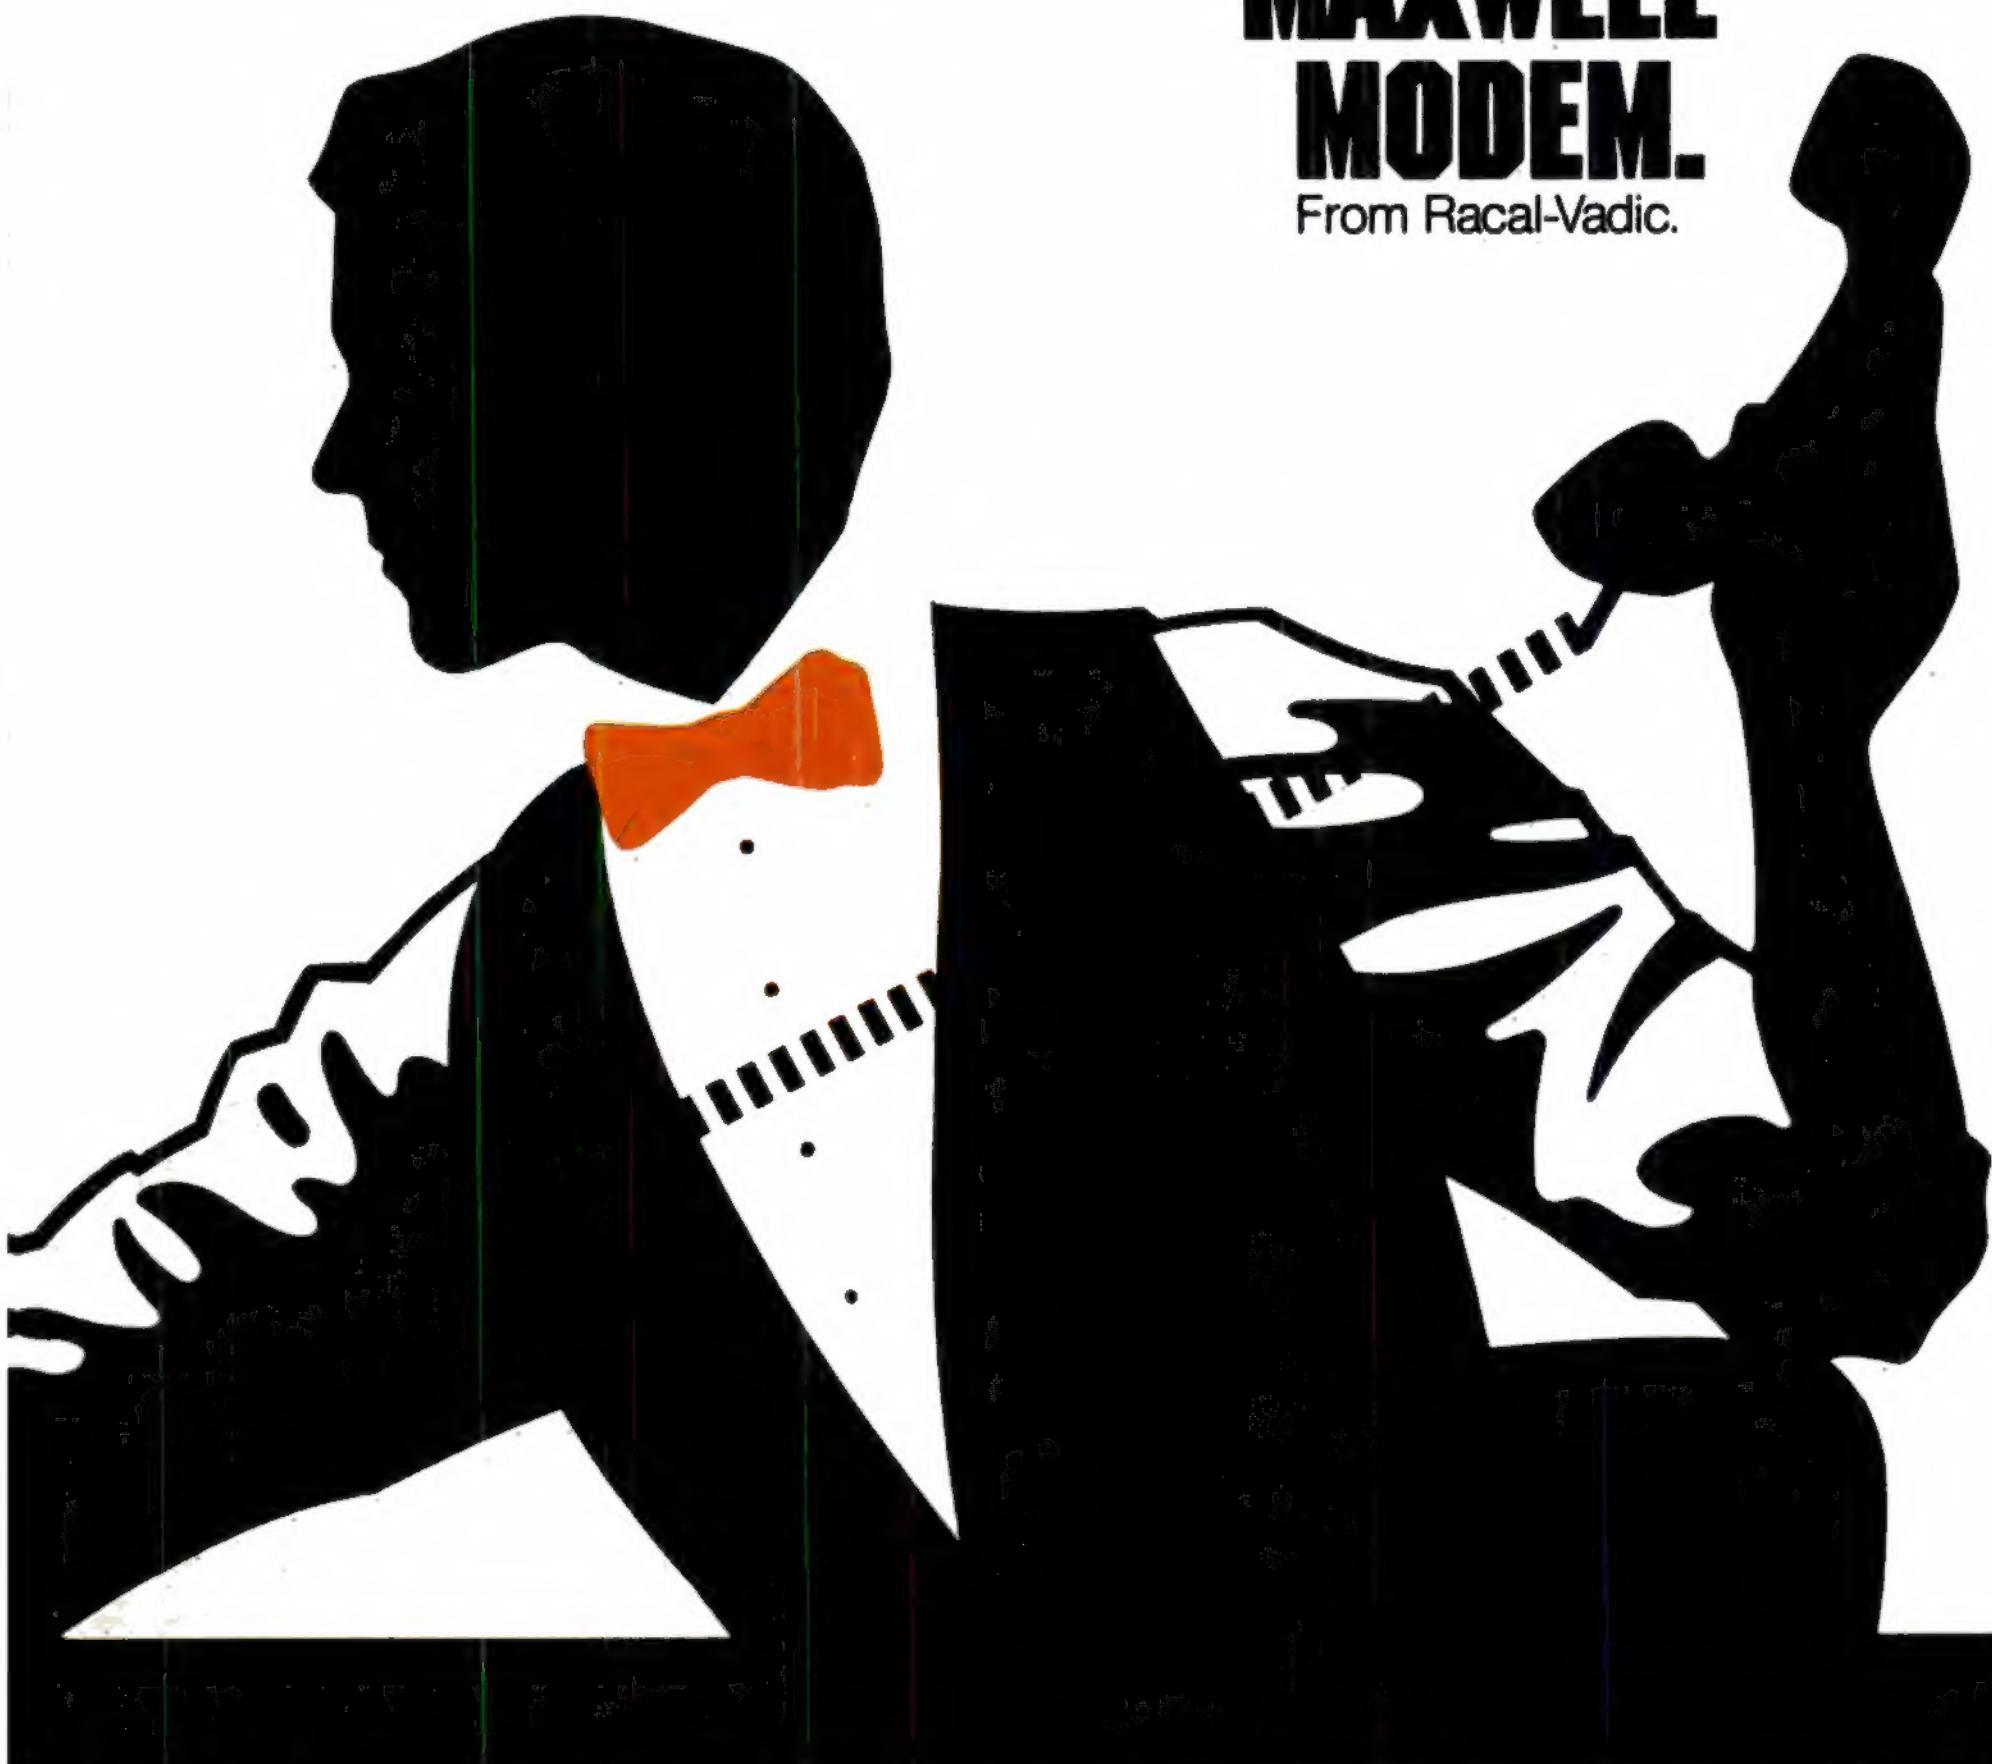

So where can you get your hands on a Maxwell Modem? To find our dealer nearest you, just do what modems do.

Call 800-4-VADICS.

Racal-Vadic, 1525 McCarthy Blvd., Milpitas, CA 95035.

## THE MAXWELL MODEM.

From Racal-Vadic.

# Win an EAGLE PC Plus II from Micro Mart™

Prize includes 13" RGB Color Monitor, 128K RAM, Two Floppy Disk Drives, SuperCalc<sup>3</sup>, MS-DOS 2.0 and CP/M-86.

That's right! You can win a new EAGLE PC Plus II micro system from Micro Mart. FREE! One lucky winner will be drawn at random on Sept. 29, 1984. All entries must be postmarked by Sept. 23, 1984. No purchase is necessary, but offer is void where prohibited by law. Anyone professionally associated with Micro Mart is ineligible.

Micro Mart is a registered trademark of Micro Mart, Inc. Eagle is a registered trademark of Eagle Computer, Inc.

# The new HERCULES Color Card gives you the parallel port IBM® forgot-for \$1 more.

## And it fits into the XT's short slot.

The new Hercules Color Card gives you these five important features.

1. A parallel printer port. If you buy IBM's color card, you won't get a parallel port for a printer. Ugh. You've just wasted a valuable slot for an extra printer card.
2. It's short. Our new Color Card uses advanced gate array technology to reduce the chip count by 30 and use less than half the board space IBM does. Which makes the new Hercules Color Card perfect for the short slot in an XT.
3. Fully IBM compatible. Any program that runs on IBM's color card will run on the new Hercules Color Card. With RGB or composite video, any IBM compatible monitor will work too.
4. Hercules Graphics Card compatible. If you have a Hercules Graphics Card (model GB101 or later), or plan to buy one, an ingenious software switch on our new Color Card allows both cards to be kept in the system at the same time.
5. Low price. At a suggested list price of \$245, the new Hercules Color Card has all these features for only \$1 more than IBM's color card.

Call for our free information kit. See why the company that made the first graphics card for the IBM PC still makes the best.

**Hercules. We're  
strong on graphics.

# Chart-Master™ turns volumes of complex data into easy-to-understand graphics.

"A picture is worth a thousand words." With this simple concept as a building block, Chart-Master is changing the way busy executives, analysts and secretaries look at, interpret and present information. In a fraction of the time required to wade through volumes of printouts, you can

Values printed at data points; both left and right Y-axis scales; floating legends & bars; both horizontal & vertical formats; exploded pie sections.

produce easy-to-understand bar charts, pie charts and scatter diagrams quickly and dramatically. Chart-Master makes it easy to customize reports and presentations with six different fonts, label placement, proportional pie charts and more.

Menu-driven Chart-Master allows you to enter data and select a chart format at the press of a button. You then preview your selection on your personal computer screen as it would appear in final form. Or, you can review the various Chart-Master graphic options to make sure you have selected the most effective format. When satisfied,

you can transfer your selection to paper or acetate transparencies for a colorful, presentation-quality chart in seconds.

Chart-Master presents a clear picture of the "bottom line," which conveyors of information understand and decision makers appreciate. That's why major corporations like GE, Eastman Kodak, Exxon, Union Carbide, GM, AT&T, DuPont, 3M, Citibank, Motorola, Procter & Gamble, and GTE rely on Chart-Master to translate "volumes of complex data into meaningful information."

Chart-Master supports the IBM Instruments XY750, Panasonic VP Series, Houston Instruments DMP29, Yokogawa PL1000 and Strobe plotters, in addition to the Hewlett-Packard family of plotters, for use with IBM PC and other compatible computers.

The retail price of Chart-Master is \$375. For a complete information kit and name of your nearest dealer, contact Decision Resources, Inc., 25 Sylvan Road S., Westport, CT 06880. (203) 222-1974.

Software Designed for Decision Makers

# SIGN-MASTER™

## Number 1 in word charts for presentations and reports

Create powerful headlines using SIGN-MASTER's color, size, and font options. Here we chose Bold Roman font.

Highlight a single character, word or an entire line at the touch of a button. Here we focus attention on one number with color and underline.

Indicate source, date, author, etc. with SIGN-MASTER's footnote option. Bold Standard font was used in this example.

THE BOTTOM LINE					
PROJECTED EARNINGS (Millions of \$)					
Sales	'78	'79	'80	'81	'82
Net Income	86.4	121.0	144.0	163.8	182.0
ROS(%)	5.9	8.8	11.4	13.4	15.7
Mkt. Share	6.9	7.3	7.9	8.2	8.6

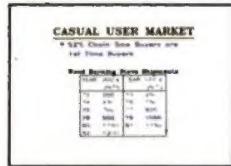

Capital expenditure required: \$5 Million  
**Net present value = \$24.25 Million**  
 (opportunity cost of capital = 24%)

(Source: Annual Report)

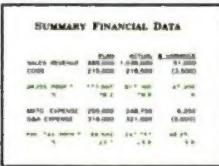

Develop professional tables quickly and easily. Once data and text is entered, SIGN-MASTER determines the spacing and layout.

Produce SIGN-MASTER word charts on paper, overheads or slides.

With SIGN-MASTER, the possibilities are limitless:

Proposals

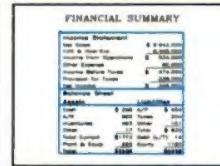

Summaries

Exhibits

Schedules

Tables

Title Pages

SIGN-MASTER is the first program designed to allow everyone from top management on down to produce colorful, attention-gaining "word charts" and tables for presentations and reports.

Created on a PC with a compatible plotter or printer, SIGN-MASTER word charts are superior in quality to typing and less expensive than typesetting or printing.

### Professional Word Charts Made Easy

In just minutes, this unique menu-driven program lets you create impressive, easy-to-read documents using words, numbers, lines and SIGN-MASTER's simple-to-master Table Mode.

### Number 1 in Quality Text

SIGN-MASTER offers the greatest variety of text options. In addition to 6 fonts, 16 sizes and 8 colors, you can justify text, underline, italicize, set margins, spacing, and more.

### An Important Presentation Tool

With SIGN-MASTER and any one of over 40

plotters, you can produce full color originals on paper and overheads. The program also works with over 10 printers to create the highest quality printer graphics available.

### Make Super Slides Quickly and Economically

Presentation-quality 35mm slides can be created in-house and inexpensively using the Polaroid Palette in conjunction with SIGN-MASTER.

For reports and presentations that get noticed, get SIGN-MASTER — Number 1 in word charts.

The retail price is \$245.00. Call or write today for a complete information kit and a demonstration at your nearest dealer. Decision Resources, Inc., 25 Sylvan Road South, Westport, CT 06880 (203) 222-1974

# Can Your Word Processor Keep Up With Your 100 WPM Typist?

It can if you have  
**WordPerfect!**

Try this test. While using your favorite word processor, put the cursor in the middle of a paragraph, turn insert on, and type. Surprisingly, very few of the leading word processors can keep up with 70, 60, or even 50 words per minute. WordPerfect keeps up easily at speeds well above 100\*.

Now, maybe this doesn't matter to you, because you don't type 100 or even 50 WPM. But you still don't want to wait forever to go to the beginning of your document, go to page 5, save your document, or add a paragraph.

At SSI anything less than fast is unacceptable. And not just because time is money, or because wasting time is foolish.

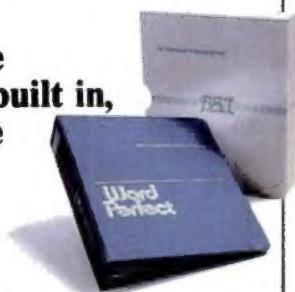

Delays are very frustrating, and frustration can easily lower the quality of your writing.

Try WordPerfect.

## WordPerfect

You'll love it—not only for the features we've built in, but also for the delays we left out.

\*Based on tests performed on an IBM PC.

# Quadmodem™ The intelligent way to talk to other computers.

Ordinary modems can't do what  
the QuadModem can. Because  
they're not as smart.

If you expect your computer to communicate effectively with other intelligent systems, you can bet it'll need an intelligent modem. That's where the new QuadModem from Quadram comes in.

QuadModem connects directly to your phone line. From there it can dial a number from memory; detect incoming baud rates; answer the phone when another modem calls; and distinguish between dial tones, busy signals, data transmissions, and human voices (remember those?). It also automatically adjusts for rotary or Touch Tone phone systems and shows you what's happening right on your computer screen.

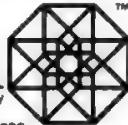

## Even problems aren't problems.

An advanced microprocessor in QuadModem can automatically spot phone problems, and the QuadModem is fully compatible with Bell 103/212A dial up modems and the most popular modem brands.

QuadModem is the complete intelligent modem: with two different versions, an internal model for IBM PC's and most compatibles and a stand-alone for the PC and other popular brands. Both come with full supporting documentation and user manuals. Plus right now, we'll include an introductory offer from The Source™. And to round it out, you can add QuadTalk, our very powerful, highly intelligent communications software that's menu-driven and very friendly.

If you expect your computer to communicate properly, it's got to act intelligently. It can with the new QuadModem from Quadram.

# The Perfect Match

**Davong  
combines good  
looks with hard  
disk and tape.**

Davong has a  
beautiful way to solve  
both your hard  
disk storage and  
backup needs.

Our new  
DataSystem  
for IBM® PCs.

We offer a  
full range of  
disk sizes, all includ-  
ing a hard disk drive plus  
tape backup unit. And the  
capability of using the tape as  
a start/stop systems device.

In fact, this Davong  
DataSystem has a lot of other  
beautiful benefits, too. Like com-  
pressed or full-volume backup  
with file-by-file or full-volume  
restore. And automatic flaw  
mapping to ensure complete  
media interchangeability.

Our full XT compatibility  
actually offers performance  
a cut above other XTs. And  
if you want even higher  
performance and password  
protection, you can use our  
Multi-OS® software.

To top it off, there's the  
sleek, contemporary styling  
of our DataSystem. And a  
low price that's equally  
attractive.

**Davong  
DataSystem  
for IBM  
PC's.**

# What's Inside

The size, number, and capabilities of some of the mass storage systems for the IBM-PC reviewed in this issue startled even PC Magazine's jaded editors and writers.

**I**t takes a lot to startle the jaded staff of *PC Magazine*. After all, consider the amount of hardware, software, and general computerware we are deluged with daily. We receive review copies of anything that has a connection, however tenuous, to the IBM PC. They range from the latest XT clone to a chocolate floppy disk. You can see that we cover a lot of ground.

**PC contributing editor Winn L. Rosch**, who is represented in this issue by reviews of six hard disks, Tecmar's *Treasure Chest* software system, and the National Memory Systems half-gigabyte hard disk drive, must be one of the most hardware-aware people this side of Silicon Valley. Yet even he was a little overwhelmed by the idea of reviewing six hard disks at one shot.

Of course, his reaction may have been partly due to *PC*'s auspicious timing. "I was not told about the project until after the first disk drive arrived," Winn reported. "I was sitting out on my front porch with one of my friends when suddenly, an air freight truck pulls up and delivers the latest word in hard disk drives. My friend thinks I have it made—\$12,000 worth of equipment dropping down out of the clear blue sky."

The disk drive was the first of some six hard disks that Winn was reviewing for

us; soon the equipment was taking over his house like kudzu on a North Carolina back road.

"At one point, I had 175 megabytes of hard disks all connected up. I had more wires than there's spaghetti in a spaghetti factory."

To hook up all the drives, Rosch borrowed an extension chassis on which he was able to slide cards in and out like a riverboat poker player. The chassis worked fine, but he soon found that he was running into space problems of a different sort.

"I had the capability to set up 40 virtual drives," he explained. "I ran out of letters in the alphabet for disk drives."

## The Monster

The equipment that raised the most eyebrows back at *PC*'s New York office was National Memory Systems' half-gigabyte hard disk drive, nicknamed "The Monster" by those of us who made its acquaintance personally.

Technical assistant Mike O'Cone, who supervises the entry of all hardware systems into *PC*'s infamous Toy Shop, had the honor of receiving, unpacking, and assembling the half-gigabyte system. It's an experience he won't soon forget.

The system came in three pieces: the drive itself, the cabinet, and a Formica table-top. As was appropriate for such a complex system, it was packed very, very well—and was proportionately difficult to unpack. "It's a mechanical marvel," said O'Cone. "Sturdy, well put together, and weighs a ton."

It took the muscles of two of our editors—O'Cone and executive editor Mike Edelhart—to unpack the cabinet and install the slide racks that the main drive fits into. They then tried to set the disk drive into the slide rack that went into the cabinet.

They pushed. And pushed. Unfortunately, instead of staying still and allowing them to insert the drive, the cabinet decided to yield the floor, as it were. Edelhart and O'Cone ended up pushing

## WHAT'S INSIDE

the machine across the Toy Shop in a sort of Laurel and Hardy routine until The Monster finally found itself up against the side of a table and gave up the fight.

Poor O'Cone was actually a casualty in the next phase of the battle. The cabinet top was packed in a wooden crate, a somewhat unusual container in an office

used to foam-filled cardboard boxes. Since we had no hammer or prybar available, he tried to make do with a screwdriver. "One of the nails tore open a finger," he complained, "and that's when I started beating the hell out of the crate."

Edelhart, O'Cone, editor Bill Machrone, and Winn Rosch, who'd flown in for the day from Ohio, spent half a day working with the system. How could they resist? It was the neatest toy they'd had to play with months.

### Asterisks

Rosch decided that a good way of testing the storage device was by filling it up and doing a search. So he loaded it with half a gigabyte of asterisks. He then took one asterisk out of the middle of the huge file and told the computer to find the discrepancy. It did—in about 4 minutes.

Yet another interesting piece of hardware that showed up in the planning of this issue was the Bernoulli Box, a new disk drive system that combines the advantages of the floppy disk drives and Winchester hard disk drives traditionally used with the PC. Mike Edelhart confessed that when he assigned the article, he was under the impression that the Box was still a somewhat rare item, even among hackers, but when he began men-

## Winchester power for your PC

The proven Winchester subsystem drives for your IBM or compatible PC. 10, 15, 25, or 33 megabytes of big system storage in a DiskSystem™ you simply plug into your system and it's ready to use. At prices that make the speed and storage of a Winchester practical. Only \$1495 for a 10 megabyte DiskSystem, \$1795 for 15 megabytes, \$2245 for 25 megabytes, or \$2795 for 33 megabytes. DiskSystems can be bootable from the Winchester. See your dealer today for DiskSystem power for your PC.

Our writers are consistently up on the microcomputer industry.

tioning it to our free-lancers, he was surprised to find that several of them already had the hardware up and running!

This actually should not have been that much of a surprise to Mike. We take pride that our writers are consistently on top of the microcomputer industry, and if they occasionally scoop our editors—well, that's one surprise we can always handle with grace.

# HARD DISK + With A Single Slot.

## Unleash your IBM-PC/XT with IDT's hard disks and SCSI technology.

Innovative Data Technology is bringing unprecedented power and virtually unlimited expansion to IBM-PC/XT users. Our new SCSI (Small Computer Systems Interface) hard disk subsystems put massive storage capacity at your fingertips—from 11 to 126 MB in a single external drive. With the capacity of configuring up to 14 drives through the SCSI bus, that puts nearly two billion bytes of on-line storage at your disposal.

### Single slot expansion

Unlike most PC add-ons, IDT's SCSI hard disk subsystems and other peripherals are connected through a single SCSI host adapter on your PC—no additional expansion slots or cards are necessary—future disks and other peripherals and additional PC hosts are simply daisy-chained into the SCSI bus.

### Multi-user capability

IDT built the SCSI hard disk subsystem with multiple users in mind. One, two, or more IBM-PCs can access disk drives and other peripherals through the SCSI bus, allowing you to build a sophisticated system tailored exactly to your requirements.

### The options are yours

With IDT's SCSI host adapter board, future expansion becomes a snap. Additional peripherals, including an extensive line of 1/2-inch IBM-compatible magnetic tape transports, are available for immediate shipment from IDT. You simply don't have to wait or worry about equipment compatibility with IDT components. Watch for 1984 announcements of streaming cartridge drives, printers, etc.

### Tomorrow's solution today

IDT's SCSI host adapter and SCSI hard disk subsystems will answer your data storage and system design requirements today. Contact IDT for complete system configuration information and details on other products.

### How to order:

Using the chart to your right, you may order IDT hard disk subsystems and SCSI host adapters by calling:

**1-800-522-1500 Ext. 717**

FOR IMMEDIATE ORDERS ONLY

Prices and availability subject to change without notice. No CODs. Send cashier's check or money order. All other checks will delay shipping three weeks. MasterCard and Visa accepted (include telephone number). Add \$12.00 for handling and shipping UPS ground within the continental U.S. California residents add 6%. Approval needed on all returns. 0-10% restocking charge on all returned merchandise.

For additional product or technical information please call or write:

**INNOVATIVE

### Successful and easy installation assured

Supplied with each component are the required cables, complete software driver package and user language instructions. The user manual will have you quickly running and appreciating the many features of the subsystems, such as quick automatic boot load of the operating system from the IDT disk subsystem.

### Satisfaction guaranteed

If not satisfied, the subsystems may be returned on approval from IDT within a 10-day period. All subsystems and components carry a six-month return-to-factory warranty on parts and labor.

**Solutions  
for '84 AND BEYOND**

### COMPONENT PRICING CHART

Model No.	Description	Storage Capacity	Price
RD 2011M	Master Disk Subsystem	11MB	\$2000.00
RD 2023M	Master Disk Subsystem	23MB	2550.00
RD 2035M	Master Disk Subsystem	35MB	2950.00
RD 2047M	Master Disk Subsystem	47MB	3150.00
RD 2126M	Master Disk Subsystem	126MB	6840.00
RD 2011S	Slave Disk Drive	11MB	1560.00
RD 2023S	Slave Disk Drive	23MB	2130.00
RD 2035S	Slave Disk Drive	35MB	2530.00
RD 2047S	Slave Disk Drive	47MB	2730.00
RD 2126S	Slave Disk Drive	126MB	6290.00
RD 8111H/A	IBM-PC/XT Host Adapter		510.00
IDT 1/2" Magnetic Tape Subsystems			Consult Factory
IDT 1/4" Streaming Back-up Tape Subsystems			Consult Factory

**Ordering Example:** If your need is a 23MB Subsystem, your order would consist of the following components:  
**1-RD 2023M @ \$2550.00 + 1-RD 8111H/A @ \$510.00 + Shipping & Handling @ \$12.00 = A Total Order of \$3072.00 + tax (if applicable)**

# Undo.Windows.

New Microsoft® Word. It makes your IBM Personal Computer think it's better than a \$10,000 word processor.

With Microsoft Word, what you see on the screen is what you get on the paper. So it's easy to spot mistakes. **Boldface**, underline, and *italics* look like this, not this: ^Bboldface^B, ^Sunderline^S, ^Iitalics^I.

And, when you make changes, paragraphs are automatically reformatted. Flush right, flush left, centered or justified. It even gives you several columns on a page, like a newspaper.

## Word forgives and doesn't forget.

There's an "uh-oh" command called Undo. Make a mistake? Or just want to experiment? Hit Undo.

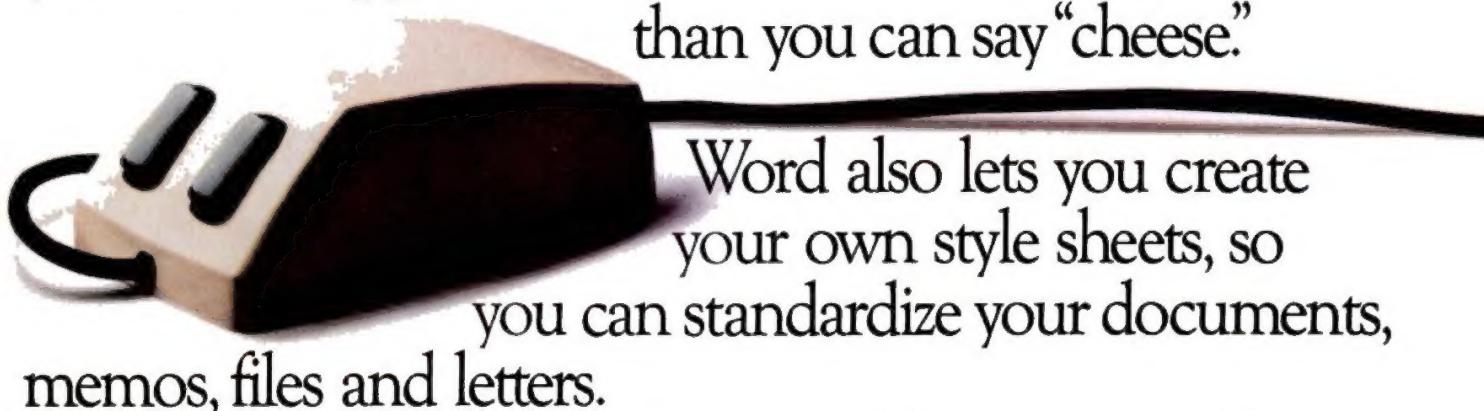

# Mouse. Finally.

Word undoes your last change and remembers things the way they were.

Word does windows. Up to eight, to be exact. So you can transfer or edit between eight different documents. Or between eight different pieces of the same document.

## Word travels fast.

Word has a Mouse, a handy little critter that lets you move copy, select commands and edit faster than you can say "cheese."

Word also lets you create your own style sheets, so you can standardize your documents, memos, files and letters.

It's not surprising that Microsoft has a way with Word. We designed the MS™-DOS operating system that tells the IBM® PC how to think. And we pioneered the first microcomputer BASIC, the language spoken by nine out of ten micros worldwide.

For a few final words, call 1-800-426-9400 (in Washington State call 206-828-8088) for a free Word brochure and the name of your nearest Microsoft dealer.

# If you're looking for a quality monitor, look for this symbol.

**HX-12. A high resolution monitor at a medium resolution price.**

HX-12 is a high resolution RGB color monitor that's colorful enough for all your graphics needs and sharp enough for word processing.

With its own cable that plugs directly into the IBM PC, the HX-12 delivers a rainbow of 16 colors on a non-glare screen. All that includes clean whites without red bleed. In fact, all the colors are clean and crisp thanks to the HX-12's .31mm dot pitch and 690 x 240 (non-interlaced) resolution.

Shop around. Nothing else compares to the HX-12 priced at just \$695.

**The SR-12 delivers even better resolution color for a better-than-ever price.**

At first glance, the SR-12 might appear similar to the HX-12 with a non-glare screen and .31mm dot pitch supporting 690 horizontal resolution. But take a closer look. SR-12's scan frequency is 31.5 KHz, allowing the SR-12 to support 480 vertical resolution in non-interlaced mode. That means a high-quality, flickerless image with text that's up to monochrome standards. What's more, you get all that quality for \$799.

For full compatibility with all IBM software, get the Princeton Scan Doubler. Priced at \$249, it allows you to run the SR-12 from a standard IBM or IBM equivalent color card in the IBM PC.

You can't beat the SR-12 for resolution or price.

**MAX-12. You won't find a better monochrome monitor for a better price.**

PGS combines easy-on-the-eyes amber phosphor and exceptional 800 x 350 resolution to give you the MAX-12, the best monochrome monitor for your money.

Check the non-glare screen. Dynamic focusing circuitry keeps the image sharp, not only in the center, but around the edges and in the corners. Then check the price. At \$249 the MAX-12 is less expensive than the leading green-on-black competitor. And there's more. The MAX-12 works with the IBM PC and other IBM compatibles.

For clarity, performance and price, your choice is clear. Make it the new MAX-12.
